

Heuser Hearing Institute GRAND ROUNDS

Grand rounds are a ritual of medical education, consisting of presenting medical problems, new technology or procedures and/or treatment to an audience consisting of doctors, residents, and medical students. Grand rounds has evolved considerably over the years with most current sessions being more like lectures and being attended by anyone interested in learning more about the presented subject.

Thursday, April 22

11:45 a.m. Brown Bag Lecture (Beverages will be supplied)

Lecture: 12:00 p.m.—1:00 p.m.

Presentation: Pediatric Hearing Aids

R.S.V.P.: April 16

dmarr@thehearinginstitute.org or 502-515-3320 extension 296

Pediatric Hearing Aids

Pediatric hearing aids are the specific hearing device type made for children. Hearing devices for children have a reduced size and modified structure. Early identification of hearing loss and early intervention will provide children greater opportunity for continued growth and development. Hearing aids are an integral part of the early intervention process. Pediatric audiology is simply giving children adult access, tailored for educational needs.

At this lecture you will learn:

- Early Identification
- Testing and Verification
- Evolution of Amplification
- Connectivity
- Children with hearing loss deserve every opportunity to explore the world, develop their skill, and achieve their full potential
